Product information

What makes our product so unique?

📈 **Above-average return opportunities:** Our strategies have been carefully developed and tested to offer you unsurpassed performance.

👛 **Monitoring by professionals:** Your trading strategies are monitored by the renowned trading division of Evisio Group. With over 30 years of experience in FX trading, you can be confident that your money is working for you in the best possible way!

🔒 **Security and transparency:** You open your own trading account with a highly respected and regulated broker. This means you have full control over your investment at all times - and have everything in view via your smartphone or PC.

🔄 **Flexibility and freedom:** Here you have a very flexible investment! You have access to your investment and returns at any time, tailored to your wishes and needs.

And the best thing about it: ARAH software, which offers such flexibility, security (segregated account) and earning potential, has never been on the market before! Ready to take the next step and unleash your financial potential? Act now - and experience how easy and rewarding **ARAH** can be for you!

PRODUCT NUMBER ONE:

MAM-PLUS

Investment amount: from EUR 30,000.00 to EUR 300,000.00

Core data: The algorithm-based trading strategies work with up to 28 currency pairs with different entry and exit scenarios. They are designed to achieve a combined performance of +11% to +17% within 12 months.

Minimum investment period: There is no minimum investment period. However, a period of at least 24 months is recommended.

Trading parameters: approx. 15% risk and 1.4% performance target per month; on the capital invested (after all fees)

Proposed By :
Elyque FZCO

Date :
03-2022

Product information

MAMplus

Use Elyques' algorithm-based trading strategies on foreign exchange markets by opening a so-called "managed account" (broker account with ACY Capital Pty. Ltd.) with complete transparency and control, as constant insight into your own trading account. Exclusively for customers and institutional investors (correspondence language: English) Note: This document (as of 03-2022) provides an overview of key features, particularly with regard to structure and risks. A very careful reading of this information is strongly recommended.

■ Handling

Use Elyques' algorithm-based trading strategies on foreign exchange markets by opening a so-called "managed account" (broker account with ACY Capital Pty. Ltd.) with complete transparency and control, as constant insight into your own trading account. Exclusively for customers and institutional investors (correspondence language: English) Note: This document (as of 03-2022) provides an overview of key features, particularly with regard to structure and risks. A very careful reading of this information is strongly recommended.

■ Data

01

Investment amount at ACY (Broker): from EUR 30,000.00 to EUR 300,000.00

02

Core datas: The algorithm-based trading strategies work with up to 28 currency pairs with different entry and exit scenarios. They are designed to achieve a combined performance of +11% to + 17% (depending on the risk/reward ratio), which is possible, within 12 months; however, as a logical conclusion it can be said that the performance of the strategy depends on the market (how the market moves) - and that the strategies are only the tool to make profits from the movements of the market and the risk management through stop loss.

03

Min. investment period: There is no minimum investment period given, but to stay invested for 5 to 7 years is recommended.

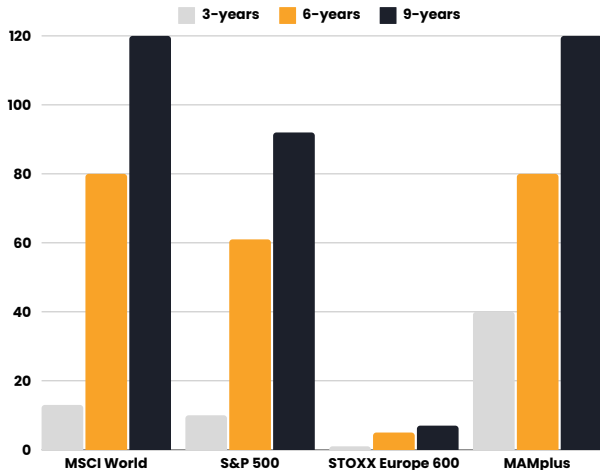

04

Trading parameters: approx. 15% drawdown and approx. 1.4% performance target per month – on equity (after all fees)

Fees

A fair fee model was deliberately chosen because hardly any investor would be able or willing to bear even a portion of the more than 3,000 hours of development costs.

1. Strategies set up fee: 4.2% as a one-time payment; billing by Elyque FZCO (www.elyque.com)
2. Strategies maintenance fee: monthly 0.35% of the account balance; will be automatically deducted by the broker (ACY)
3. Strategies usage fee: 3.5 USD each lot, for every entry that has been closed; will be automatically deducted by the broker (ACY)
4. Strategies success fee: monthly 35% of the positive performance after a so called high-water-mark has been reached; will be automatically deducted by the broker (ACY)

Since the trading sizes set are in relation to the amount of the software user's account balance, he is obliged to report deposits and withdrawals (including partial or full withdrawals) via his customer access (support area) before they are carried out, otherwise either (in the case of deposits) the target performance of the strategies cannot even come close to being achieved or (in the case of payouts) the risk would be too high. Elyque is not responsible for disruptions and/or failures of the selected software-based trading strategies, as this technology depends on a functioning technical environment (server, internet, electricity, etc.). Such an incident will of course be rectified immediately by the relevant authorities, although the time frame required for this cannot be clearly defined.

Support

Compliance: by the Broker (ACY; www.acy.com)

Strategies: maintenance: Evisio Group LLC (www.evisio-group.com)
